

First of all regarding this action trying to be taken by the NAB, Give me a break .I pay for this service and expect my moneys worth and having the weather info is absolutely fantatsic and something extra that makes worth paying for my MUSIC worthwhile.I was very reluctant to subscribe to Xm radio when it came out (after why pay for something that is already free aka fm staions)But seeing how the Fcc or who ever has let certain compaines buy huge market shares in the usa (clear channel for one) All the radio staions play the same 300 songs no matter what city they are in as long as they are all owned by the same company their music selection is all the same songs.thus making xm radio with no song limit (any song ever recorded is being played ) I can listen for weeks ,months without ever hearing same song twice now thats nice and worth paying for .If the commercial staions would do the same and they can but wont there would not be a market for xm radio! Please ,Please let xm give us the extras ,we do pay for the service and I expect something over and beyond commercial stations.Xm is trying to do that and they are doing a Fantastic job!!!! Commercial radio could learn a lot from them if they would only pay attention.If the NAB would like to do SOMETHING CONSTRUCTIVE have them limit Clear Channel where they broadcast and all there repition of music .There one of the reasons I am willing to pay for radio because they stink so bad. Thanks
